

NEW PRODUCT

DCT-927

Temperature Actuated Drain Tempering Kit

NEW FEATURES

- ◆ Smaller compact body design
- ◆ Space saving horizontal design
- ◆ Higher tempered water capacity
- ◆ Can be directly mounted to humidifier reservoir
- ◆ Single drain tempering kit design for use on all units
- ◆ Temperature actuated control valve - no need to run power wiring

SYSTEM DESCRIPTION

The DCT-927 drain tempering kit is designed to provide drain water temperature of less than 140°F. The DCT-927 can be used with all PURE Humidifier Co. products.

The system utilizes a temperature sensor to sense the water temperature and open the temperature-actuated cold water mixing valve. Since the system is temperature-actuated, no power supply is required.
